

Hermes' Coloring Pages

Hello there Dragon Enthusiast! I'm Hermes the dragon, and today I'd like to show you how my heart and lungs work. Add some color to find out!

Can you follow the path of blood through my heart? The 3 bundles of vessels represent the journeys my blood takes through my lungs (right and left) and the rest of my body (bottom).

Here are my lungs. All those balloony things on the edges? They're called air sacs, and birds have them too.
